Build a layout

A layout is one screen design for one zone. The wizard walks you through it.

1. **Open Layouts, then + New Layout.** A quick five-step wizard opens.

2. **Pick the zone this screen serves:** Welcome, Discovery, Spotlight, Engage, or Internal.

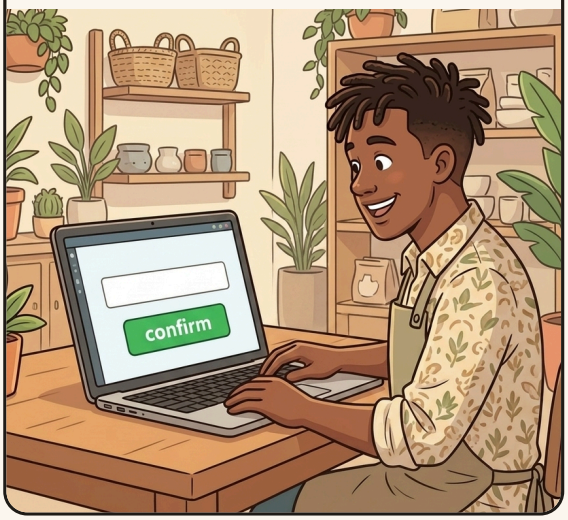

3. **Choose orientation:** Landscape or Portrait.

4. **Choose a template** to start from — then make it yours.

5. **Name it, then Create Layout.** It lands in your Library.

✓ **That's it.** Deploy it to a screen, or drop it into a playlist.
