Add content to your library

Your media library is everything your screens can show. Fill it in four steps.

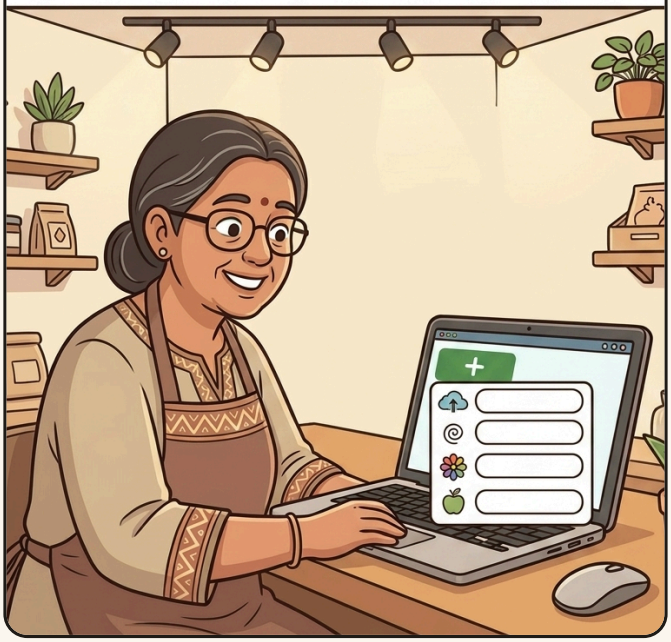

1. **Open Content, then the Media tab.** This is your library — every image and video your screens can pull from.

2. **Top-right, tap the green + Add button.** (Or ask Twig to find or make something for you.)

3. **Pick a source:** Upload Files, Canva, Google Photos, or Apple Photos.

4. **Done.** They land in your library, auto-tagged and ready to drop into any layout.
