BrandCast

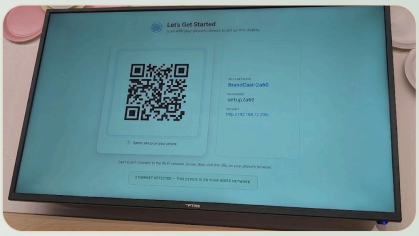

DIGITAL SIGNAGE, BUILT IN A REAL STORE

Your screens should be doing more.

BrandCast runs every screen in your business from your phone, so the right message shows up in the right spot.

BrandCast came out of a real store. One of our founders put displays where he was told, then realized they weren't engaging or helping to drive sales in any measurable way. So he built BrandCast to change that.

ZERO TO LIVE IN ABOUT FIVE MINUTES

1 Connect

2 Pair

3 Live

Your Message

The window, the counter, the wait area. Each screen shows what that part of the space is for.

Update from Anywhere

Twig, our AI, drafts content in your brand and your words. You approve it from your phone, then it goes live.

Always Fresh

Pull content from Google Photos, Apple Photos, or Canva, plus 3M+ built-in stock photos to start from.

No Cost. Just honest feedback.

We're setting up our first users now. We offer free hardware and help getting started. We ask for feedback to make our product the best it can be. Scan to join the list.
