BrandCast

SPACES SHOULD ENGAGE

Turn every screen into your best salesperson.

The right message in every part of your space, so customers are engaged instead of ignored.

Most screens in a small business are doing nothing. A logo on a loop, or worse, a dark rectangle over the busiest wall in the room.

BrandCast turns that screen into a reliable display that drives the business, and you stay in control of every word that goes up.

WHAT YOU GET

The right message, everywhere

Different parts of your space do different jobs: welcome at the door, spotlight what's on now, engage the people who wait. Every screen earns its wall.

Reliable, and looked after

With our fully-managed hardware, your screen just works: plug into any TV, dims at night, wakes at open, never goes blank. We catch problems before you do.

Designed in minutes, you approve

Describe what you want in plain English and it designs it: layouts, images, even video, in your brand. Built by a Google AI engineer. You approve what goes live.

Keeping a screen updated is the easy part. The point is a screen that pulls its weight, turning the space you already pay for into a room that sells.

See what your screens could be doing.

Start with one screen. We send the player; plug it into any screen and you're live in minutes. Set up your first display at **brandcast.app**.
